Career Objective

Final-year B.Tech Computer Science student with hands-on experience in Java, Spring Boot, MySQL, REST APIs, JDBC, and Backend Development. Skilled in developing scalable web applications using MVC Architecture and Git. Seeking a Java Backend Developer or Software Engineer role.

Education

Fabtech Technical Campus, Sangola 2022 – 2026

BTECH (Bachelor of Technology)

(CGPA: 7.05) 2021– 2022

Career Launcher Junior College, Mumbai

HSC (Percentage: 64.50%) 2020– 2021

Shri Siddhanath High School, Walekhindi

SSC (Percentage: 84.50%)

Skills

Programming Languages: Java, SQL, Servlets, JSP, Python **Frameworks:** SpringMVC, Spring Boot

Web Languages: ReactJs, HTML, CSS, JavaScript, Bootstrap. **Databases:** MySQL.

Tools: Eclipse IDE, MySQL Workbench, Visual Studio Code, Git, Github, Postman, Maven.

Training

Java - Full Stack Development 9/4/ 2025 – 23/12/2025

(Technologies Used: Java | Spring | Spring Boot | SQL | React)

Riyality Software Services, Sangola

- Gained hands-on experience in web development projects using Java, Spring Boot and React.
- Developed strong debugging and problem-solving skills during project execution.
- Worked on real-world applications, improving coding efficiency and understanding of full-stack technologies

Project: Insurance Management System (Technologies Used: Java | MySQL | Spring boot | REST API)

- Developed a full-stack Insurance Management System with secure login authentication, token-based authorization, and role-based access control for managing customers, policies, and leads.
- Designed and implemented **RESTful APIs** using Spring Boot and Spring Data JPA to perform complete CRUD operations with MySQL database integration.
- Built a responsive frontend using **HTML, CSS, and JavaScript**, integrating it with backend APIs using the Fetch API for seamless data management.
- Implemented dashboard reporting, search functionality, form validation, session management, and authentication using Interceptors and token-based security.

Project : Student Management System with Role-Based Access (Technologies Used: React.js | HTML5 | CSS3)

- Developed a **Student Management System** using **React.js, Axios**, and **JSON Server**.
- Implemented Role-Based Access Control (RBAC) with separate functionalities for Admin and Faculty users.
- Built secure login and registration modules with role-based access and user authentication.
- Enhanced user experience using React Toastify for notifications, React Icons, and responsive CSS for a modern interface.

Technical Highlights

- Good Knowledge of Core Java and Python.
- Good Knowledge of GitHub.
- Knowledge of Object-Oriented Programming.
- Good Knowledge of ReactJS.
