Career Objective

Final-year B.Tech Computer Science student with hands-on experience in Java, Spring Boot, React.js, MySQL, REST APIs, and Backend Development. Seeking a Java Full Stack Developer or Software Engineer role.

Education

Degree	Institute	Year	Score
B.Tech CSE	Fabtech Technical Campus,Sangola	2022-2026	CGPA 7.05
HSC	Career Launcher Jr. College, Borivali West, Mumbai	2021-2022	64.5%
SSC	Shri Siddhanath High School,Walekhindi Tal -Jath,Dist-Sangli	2020-2021	84.5%

Skills

Programming Languages: Java, SQL, Servlets, JSP, Python **Frameworks:** SpringMVC ,Spring Boot

Web Languages: Reactjs , HTML, CSS, JavaScript, Bootstrap. **Databases:** MySQL.

Tools: Eclipse IDE, MySQL Workbench, Visual Studio Code, Git, Github, Postman, Maven.

Training

Java - Full Stack Development

9/4/ 2025 – 23/12/2025

(Technologies Used: Java | Spring | Spring Boot | MySQL | React.js)

Riyality Software Services, Sangola

- Gained hands-on experience in web development projects using Java, Spring Boot and React.
- Developed strong debugging and problem-solving skills during project execution.
- Worked on real-world applications, improving coding efficiency and understanding of full-stack technologies.

Project: Volunteer Management System | Spring Boot, Java, React.js, MySQL

- Developed a full-stack **Volunteer Management System** using **Spring Boot**, **React.js**, **Java**, and **MySQL**.
- Built a responsive **React.js** frontend with reusable components, **React Router**, **Axios**, and role-based navigation for an improved user experience.
- Developed secure **RESTful APIs** using **Spring Boot** with a layered architecture (**Controller**, **Service**, **Repository**) and integrated them with the React frontend.
- Implemented **JWT-based authentication** and **role-based access control (Admin & User)** to secure application access and protect user data.
- Used **MySQL** for data storage and performed CRUD operations through **Spring Data JPA/Hibernate**, ensuring scalability and maintainability.

Project: Employee Management System (EMS) | ReactJS, Axios, JSON Server

- Developed a responsive Employee Management System using ReactJS, React Router, Axios, and JSON Server, implementing complete CRUD operations for employee records.
- Implemented **role-based authentication and authorization** (Admin, HR, Employee) with protected routes and session management using **Local Storage**.
- Designed an interactive **dashboard** with user statistics, profile management, search, filtering, pagination, and responsive UI to improve usability.
- Integrated **Axios REST API** calls with JSON Server for efficient data management, including user creation, update, deletion, and retrieval.

Technical Highlights

- Good Knowledge of Core Java and Python.
- Good Knowledge of GitHub.
- Knowledge of Object-Oriented Programming.
- Good Knowledge of ReactJS.
